monitoring relays

RPN-1VFS-A400

- **Multifunctions monitoring relays**
(AC voltage monitoring in 3-phase network - 3(N)~ 400/230 V)
- Monitoring of phase failure, asymmetry, phase sequence
- Hysteresis mode • Tripping delay
- Cadmium - free contacts 1 CO • AC input voltages
- Cover - modular, width 17,5 mm
- Direct mounting on 35 mm rail mount acc. to EN 60715
- Compliance with standard EN 50178
- Recognitions, certifications, directives: RoHS, **CE** **ERC**

⑤ Requires terminal (N) connection to the neutral wire.

Functions

LOST D - Phase failure monitoring (with delayed disconnection of contact R).

If the voltage at all phases will exceed 175 V and no error condition occurred earlier, then the operational relay R is switched on. If voltage at one of the three phases, L1, L2, L3 falls to a value of 175 V, then after applying a delay time 4 s, the R contact is switched off. The operational relay R will be switched back on when the voltage value at the given phase rises to 180 V. A rapid phase loss is treated as a phase sequence error and no delay is then applied.

ASYM D - Asymmetry monitoring (with delayed disconnection of contact R).

The operational relay R switches to the off position when the asymmetry exceeds the value 55 V. The asymmetry caused by the return voltage of the receiver (e.g. a motor that still operates in only two phases) does not disconnect.

SEQ D - Phase sequence monitoring (without delay for disconnection of contact R).

If all the phases are connected to the terminals in the correct sequence (L1->L1, L2->L2, L3->L3) or in a consecutive sequence, then the operational relay R switches on. When the phase sequence changes, the operational relay R is immediately switched off.

Allowed connections combinations phases with terminal:

Terminal	Phase
L1 ->	L1
L2 ->	L2
L3 ->	L3
L1 ->	L2
L2 ->	L3
L3 ->	L1
L1 ->	L3
L2 ->	L1
L3 ->	L2

L1: misalignment phase 0°
 L2: misalignment phase $2\pi/3=120^\circ$
 L3: misalignment phase $4\pi/3=240^\circ$

Additional functions

LEDs: two-colour (green/red) LOST+ASYM, SEQ - are lit permanently or flashes at 500 ms period where it is lit for 50% of the time, and off for 50% of the time. Yellow R is lit permanently.

Supply: the relay may be supplied with AC voltage 48...63 Hz of 161...264,5 V.

LED indication	LOST+ASYM 	SEQ 	R
green lights up all the time	power supply and asymmetry are correct	correct phase sequence	-
red lights up all the time	ERROR power supply or asymmetry	ERROR phase sequence	-
red flashes	ERROR power supply or asymmetry 	-	-
yellow does not light up	-	-	contact R disconnected
yellow lights up all the time	-	-	contact R connected

 Measurement of the tripping delay time (disconnection of contact R) after has occurred a phase failure or asymmetry error.

Front panel description

Mounting

Relays **RPN-1VFS-A400** are designed for direct mounting on 35 mm rail mount acc. to EN 60715. Operational position - any. **Connections:** max. cross section of the cables: 1 x 2,5 mm² (1 x 14 AWG), stripping length: 6,5 mm, max. tightening moment for the terminal: 0,5 Nm.

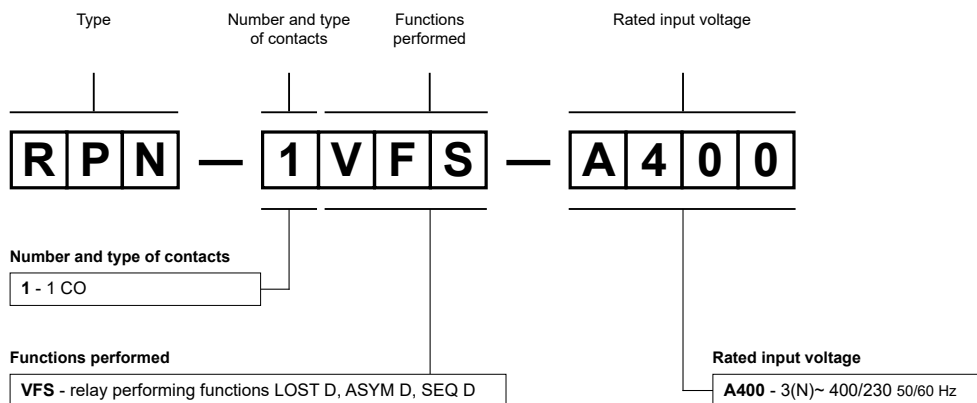

Two catches:
easy mounting
on 35 mm rail,
firm hold
(top and bottom).

**Mounting wires
in clamps:**
universal screw
(cross-recessed
or slotted head).

Ordering codes

Example of ordering codes:

RPN-1VFS-A400 monitoring relay **RPN-1VFS-A400**, multifunction (relay perform 3 functions), cover - modular, width 17,5 mm, one changeover contact, contact material AgSnO₂, rated input voltage = monitoring 3(N)~ 400/230 V AC 50/60 Hz

PRECAUTIONS:

1. Ensure that the parameters of the product described in its specification provide a safety margin for the appropriate operation of the device or system and never use the product in circumstances which exceed the parameters of the product. 2. Never touch any live parts of the device. 3. Ensure that the product has been connected correctly. An incorrect connection may cause malfunction, excessive heating or risk of fire. 4. In case of any risk of any serious material loss or death or injuries of humans or animals, the devices or systems shall be designed so to equip them with double safety system to guarantee their reliable operation.
